1.4 Data Transmission & Authentication Mechanism

All data exchange would be done over secure HTTP (HTTPS). Request from ULIP's system would be made in IWAI system through a data exchange URL that has following form:

For Production: <https://www.ulip.dpiit.gov.in/ulip/v1.0.0/TOLL/01>

Body:

```
{ "tollCode": "180001",  
  "tollName": "",  
  "stateName": ""}
```

Access to above data exchange URL would be authorized by use of a security mechanism implemented by the ULIP system. It is as follows:

- First time access: It would require a username and password [which would be shared with user beforehand]. Once user hit with valid user id and password, ULIP system will return a basic authorization token to user, using that token user will communicate with ULIP system until tokens will not get expired.

Summary of HTTP Basic Authentication is as follows:

First time User hits ULIP secured API through username and password for access token as follow-

```
curl --location --request POST 'https://www.ulip.dpiit.gov.in/ulip/v1.0.0/user/login' \  
  --header 'Accept: application/json' \  
  --header 'Content-Type: application/json' \  
  --data-raw '{"username": "xxxxxxx", "password": "xxxxxxx"}'
```

Authorization:

Bearer

eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJ0ZXN0MSIsImhdCI6MTYyNTIzMDQyNywiYXBwcyI6ImRhZGFwdXNoIn0.rhumwWJ8BWeeHe9CYmIV1UKyJk-kLHA_ovX5Zi2OwxEv-td-KpxnfbKDI_8FZsOoggqx3Al-Du1y2qMoUD7uzA'

Upon successful authentication, the user would be logged into the ULIP system and get an access token. Though this token user can communicate with ULIP. This token has expiry time which represents user session. The session time out for the same to be fixed hour, generally it is for 30 minutes. If there is no request coming from user for 30 minutes, then session (token) will be expired, and user need to re authenticate.

ULIP Integration Document

Using The above token, user can request ULIP system for CIN details as follow -

For Staging:
